

EuroStreetLed of SWEDEN *Scandinavian streetlights*

EuroStreetLed is a Swedish independent, free-thinking and innovative company that develops manufactures and markets luminaries of the highest quality and the latest technology, with a delicate and classic sculptural form, designed to enrich public outdoor environments.

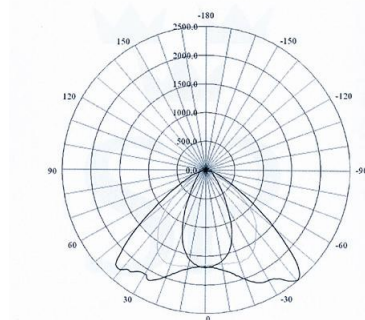

The ESL LIM LREC 70 W

Common to EuroStreetLed's luminaries is that they are extremely energy efficient, that they have unsurpassed lighting qualities, that they are free from environmentally harmful substances and that they are fully recyclable.

Aluwave has designed the LED-module and dimensioned the thermal solution in close cooperation with EuroStreetLed. Aluwave delivers the LED-modules to the final assembly from manufacturing facilities in Sweden.

The LIM series is designed by Pamela Lindgren, Designer MFA, SVID with Kristina Sahlqvist Architect SIR / MSA.

The ESL LIM LREC 70 W Polar diagram

Aluwave AB is an innovative Swedish company that designs and supplies intelligent modules and lighting systems based on LED (Light Emitting Diode) technology. The foundation of Aluwave is based on the expertise in thermal management and the unique substrate system called Alunat™.
